

Assignment

Assignment Title: **Flutter App with Back4App Integration**

Assignment Title: **Flutter App with Back4App Integration**

ID: 2022MT13221, Name: Rajan Dhingani Subject: Cross Platform Application Development

Assignment Description:

In this assignment, you will create a Flutter app that connects to Back4App, a Backend-as-a-Service (BaaS) platform, to manage tasks. You will be responsible for setting up the Back4App backend, creating the Flutter app, and implementing the necessary functionality to interact with the backend.

Use the git hub repository

<https://github.com/RajanDhingani123/git>

Assignment Steps:

Step 1: Set Up Back4App

Sign up for a Back4App account (if not already done).

Create a new Back4App app.

Create a class in Back4App named Task with columns title (String) and description (String).

The screenshot shows the Parse Dashboard interface. At the top, there are navigation links: back4app, AI Agent, My Apps, Dashboard (with a dropdown arrow), Docs (with a dropdown arrow), Support, and a greeting: Hello, 2022mt13221. Below the header, there's a search bar with the placeholder "parse-dashboard.back4app.com/apps/b863bdc3-9cbd-4bbb-97ee-83ac2d71ac52/browser/Todo".

The main area displays a table titled "Todo" with the following columns: objectId, updatedAt, createdAt, ACL, title, done, and titledescription. There are 6 objects listed:

| | objectId | updatedAt | createdAt | ACL | title | done | titledescription |
|---|------------|-----------------------|-----------------------|---------------------|-----------------------|-------|-----------------------|
| 1 | m5sBuRqNP0 | 10 Nov 2023 at 12:... | 10 Nov 2023 at 12:... | Public Read + Write | data entry | False | data entry |
| 2 | EZwthis4Z3 | 10 Nov 2023 at 12:... | 10 Nov 2023 at 12:... | Public Read + Write | Task1 | False | Task1 |
| 3 | 3zVhK18j1N | 10 Nov 2023 at 12:... | 10 Nov 2023 at 12:... | Public Read + Write | Create a new Back4... | False | Create a new Back4... |
| 4 | SdZQqYAcGG | 10 Nov 2023 at 12:... | 10 Nov 2023 at 12:... | Public Read + Write | Step 1.1: Set Up B... | False | Step 1.1: Set Up B... |
| 5 | EqPHDU4mF | 10 Nov 2023 at 12:... | 10 Nov 2023 at 12:... | Public Read + Write | Sign up for a Back... | False | Sign up for a Back... |
| 6 | R1EguGFYoa | 10 Nov 2023 at 12:... | 10 Nov 2023 at 12:... | Public Read + Write | Step 1: Set Up Bac... | False | Step 1: Set Up Bac... |

On the left sidebar, under "MyBitsDemo", there are sections for Database (Todo), Browser (Role, User, B4aVehicle, MyFirstClass, TaskDashboard, Todo, task), Index Manager, Blockchain, Cloud Code, API, App Settings, and More. A "NEW" button is visible next to the Blockchain section. At the bottom of the sidebar are Support and three-dot menu buttons.

Step 2: Flutter Setup

Create a new Flutter project.

Add the required dependencies to your pubspec.yaml file.

Initialize the Parse SDK in your Flutter app.

File Explorer View showing the directory structure of 'flutter_parse' on 'KB (D:)':

Step 3: Task List

Create a screen in your Flutter app to display a list of tasks.

Implement a function to fetch tasks from Back4App using the Back4App API.

Display the tasks in a list view with titles and descriptions.

ADD

| ! | Step 1: Set Up Back4App | <input type="checkbox"/> ! |
|----------------|--|--|
| ! | Sign up for a Back4App account (if not already done). | <input type="checkbox"/> ! |
| ✓ | Step 1.1: Set Up Back4App | <input checked="" type="checkbox"/> ! |
| ! | Create a new Back4App app. Create a class in Back4App named Task with columns title (String) and description (String). | <input type="checkbox"/> ! |
| ! | Task1 | <input type="checkbox"/> ! |

Step 4: Task Creation (10 points)

Create a screen for adding new tasks.

Implement functionality to create and save tasks to Back4App.

Verify that newly created tasks appear in the task list.

Step 1: Set Up Back4App

Step 6: Bonus Features

Add a feature to edit and update existing tasks.

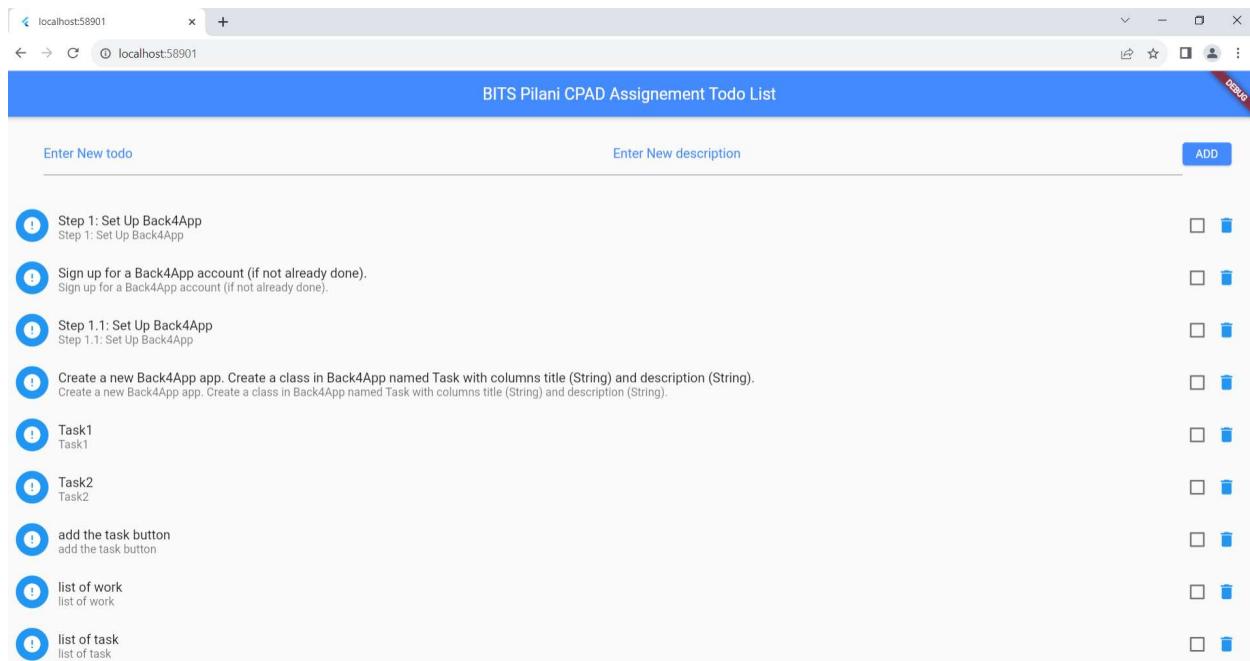

Implement a feature for task deletion.

Add any additional features.

Click check for the done task

Delete symbol to delete the task

Submission:

Submit the link to your GitHub repository where you've hosted your Flutter app code.

Include a short README explaining how to set up and run your app.

Provide a brief overview of any bonus features you've implemented (if any).

Appendix A:

Need to set some local setting

Below file need to add manually under the local user folder

C:\Users\xxxx\AppData\Local\Pub\Cache\hosted\pub.dev\parse_server_sdk_flutter-7.0.0
